Personal Statement

Senior Unity Game Developer with 10 years of experience in 3D application development and software architecture. Expert in applying strict OOP, Design Patterns, and SOLID principles to build highly optimized gameplay systems, rendering pipelines, and scalable User Interfaces.

Skills.

- **Engine & Platforms:** Unity, Unity Rendering Pipeline, Runtime Architecture, 3D Applications, Windows, Android SDK, iOS Publishing, VR (Oculus, Vive).
- **Core Engineering:** C#, OOP (Object-Oriented Programming), SOLID Principles, System Architecture, 3D System Optimization, Problem Solving.
- **Tools & Version Control:** Git, Git LFS, GitHub, Bitbucket, SourceTree, Jira, Jenkins, Visual Studio.
-
- **Systems & Integration:** 3D Spatial Mechanics, Auto-solver Algorithms, DOTween, Photon Multiplayer, Firebase, REST APIs.
- **Languages:** C#, C++, JavaScript, Python, Java, Node.js.

Work Experience

August 2020 - Present

Lead Unity Game Developer | Gimzat Studio *August 2020 to Present*

- Lead the technical development of hybrid-casual and puzzle games, taking projects from the initial GDD and prototypes all the way to global launch.
- Built the core architecture for Speed Maze (5M+ downloads) and Colors Sorting (5M+ downloads), writing clean, scalable C# code (OOP/SOLID) while keeping up with fast release cycles.
- Handled performance profiling using the Unity Profiler, Xcode Instruments, and Android Studio to hit a steady 60fps on mid-range phones via object pooling, draw call batching, and eliminating GC spikes.
- Managed the native cross-platform builds using Android Gradle and iOS CocoaPods, resolving dependency conflicts to cleanly integrate SDKs like Firebase, AppLovin MAX, AdMob, and Adjust.
- Programmed the core mechanics for new game ideas quickly including sorting logic, pathfinding, and dynamic tray systems, so we could get playable builds ready for immediate market testing.
- Collaborated directly with a cross-functional team of 5+ game designers and artists to turn complex ideas into stable, playable features for iOS and Android within strict 3-to-6-month release cycles.

Key Achievements:

- **Speed Maze** – 5M+ downloads ([Google Play Link](#)).
- **Colors Sorting** (with Unico Studio) – 5M+ downloads ([Google Play Link](#)).
- **Water Sort** – 200K+ downloads ([Google Play Link](#)).

Featured in **Pocket Gamer** interview: [Read here](#).

Extended Outsource Partner (Remote) | Various International Companies
July 2021 - Present

- Developed multiple Localized **multiplayer board and sports games** outsourced to telecom and service providers for VAS offerings across **all Arab countries**.
- Games included:
 - **Bowling Online** – Multiplayer (1v1, 2v2), competitive leaderboards.
 - **Ludo** – Classic and fast modes with real-time multiplayer.
 - **Domino** – Regional rule sets, 2 & 4 player support.
 - **Pool & Snooker** – Full physics-based gameplay with multiple modes: 8-ball, 9-ball, and Snooker.
- All games supported **multiplayer (2–4 players), text chat, and voice chat**, tailored for large-scale global distribution.
- **Handled projects as an extended outsource partner** for different companies, including:
 - **Red Circle Advertising** – Built a **VR project (launching event for Tremfya medication)** for their client **Johnson & Johnson**.

Jun 2019 - August 2020

Senior Game Developer, PlaiiMake, France

- Sole developer handling mechanics and systems for [NEOEXPERIENCES'](#) casual games.
- Completed and delivered 4 published titles: *Ice Cream*, *WhoolyLand*, *Zombies vs Brains*, *Pirates*.

Games Links : [Ice-Cream Factory](#), [Woolly Land](#)

May 2019 - Jun 2020

Remote Game Developer & Node js Developer(Part Time), Hub43, Cairo, Egypt.

- **Game Developer (Galaxy Knights):** Implemented space gameplay mechanics, Photon networking, backend services, and chat systems.
 - **Node.js Developer (Health Insurance Platform):** Developed CRUD features with MongoDB, added Jest unit/integration tests.
-

April 2018 - April 2019

Game Developer – FunRock (Stockholm, Sweden)

- Enhanced and scaled features for a complex mobile strategy game (*Ethad Al Abtal*).
 - Focused on client-side optimization and maintaining high code quality standards.
 - **Game Link :** [Ethad Al Abtal](#)
-

July 2017 - March 2018

Game Developer – Cryptyd (Alexandria, Egypt)

- Developed new gameplay systems and multiplayer features for the card game *Baloot Quest* (Photon networking).
- Integrated cloud services and ensured smooth multiplayer performance.

Game Link : [Baloot quest](#)

Education

October 2016 - July 2017

- **9-Month Diploma in Game Development Track** – ITI, Giza, Egypt (2016–2017)

September 2012 - May 2016

B.Sc. in Computer Science – Suez Canal University, Egypt (2012–2016)

- Graduation Project: *3D Interactive Simulation for E-Learning* (selected among top 5 by TIEC Egypt).

Courses and Certificates

- Intel Youth Enterprise Program – Suez Canal University
- Technology Innovation & Entrepreneurship Center (TIEC) – Certified
- IBM Summer Training (2015)

Languages

- Arabic (Native)
- English (Very Good)
